

RESIDENTIAL & TAIL GATING ALUMINUM FLAG POLES (TM)

MULTI-USE TELESCOPING FLAGPOLE

The Multi-Use Telescoping flagpole is like no other flagpole we've ever previously offered. The first word that comes to mind with this pole is versatile.

The four sections of this pole extend out and snap-lock at 19'. The bottom diameter of the pole is 2" while the top section is 1 3/8". If you wanted the pole to be a bit shorter, then just use the built-in twist locks to adjust the pole from anywhere between 7' and 19'. Use this flagpole with the supplied 14" PVC ground sleeve for traditional installation or pull out the included trusty Tire Mount and drop the pole into the sleeve. It's that easy!

In order to fly your flag, just use the spring clip located at the top section of the pole and then attach the counter weight to the bottom grommet hole. That's it! The pole is constructed to fly one flag only or if you wanted to display a free-flowing banner, just take off the 3" gold aluminum ball and then add the 48" aluminum rotating arm. Slide your banner over the arm and you have an instant advertising medium.

This pole is perfect for residential display, tailgating at your favorite events, county or state fairs, sidewalk advertising, or car lots. There are many uses for this pole. When you are done with the pole, the sections slide into one another to allow for easy transportation. Replacement parts are available, inquire.

Shipping of the pole is through standard ground transportation and in two cartons at the oversize rate. Imported.

EXPOSED HEIGHT	ITEM #	FINISH	BUTT DIAM	TOP DIAM	FLAGGED WINDSPEED	SUGGESTED FLAG SIZE	Each	3
19'	648	Brushed	2"	1 3/8"	45	3' X 5'	\$ 115.00	\$ 110.00

PATIO

This lightweight, modular flagpole is a popular, inexpensive choice for the home or apartment complexes. Each section is manufactured from 6063T6 seamless aluminum tubing to provide a long lasting, rust-free beautiful appearance. The swaged top of each section fits into the bottom of the section above it to provide a strong, water repellent joint and an attractive, straight assembly. The shipping container can be used to store your flagpole when not in use. Standard fittings include a gold anodized, spun aluminum ball; a cast aluminum stationary single sheave truck; braided nylon halyard, nylon snaphooks; cast aluminum cleat and ground setting tube. **Optional flash collar at \$15.00 each. (additional shipping charges of \$5.00 per pole needed)**
